

Ejercicio 1:

The screenshot shows the NetBeans IDE with the following components:

- Source Editor:** Displays the code for `Ejercicios.java`. The code includes a menu loop and a logic section for finding the maximum of two numbers.
- Output Window:** Shows the execution output for "ExamenFinal (run)". It displays the menu options, the user's input '1', and the result of Ejercicio 1: "El numero mayor entre los dos numeros ingresados es : 3".
- Project Explorer:** Lists the project files, including `Ejercicio1.java`, `Ejercicio2.java`, `Ejercicio3.java`, and `Ejercicios.java`.

Ejercicio 2:

The screenshot shows the NetBeans IDE with the following components:

- Source Editor:** Displays the code for `Ejercicios.java`. The code includes a menu loop and a logic section for generating a pyramid of stars.
- Output Window:** Shows the execution output for "ExamenFinal (run)". It displays the menu options, the user's input '5', and the result of Ejercicio 2: a pyramid of stars.
- Project Explorer:** Lists the project files, including `Ejercicio1.java`, `Ejercicio2.java`, `Ejercicio3.java`, and `Ejercicios.java`.

```
42 } else {
43     System.out.println();
44     for (int p = 1; p < numero; p++) {
45         if (p % 2 == 1) {
46             if (filas <= p) {
47                 filas = filas + 1;
48                 System.out.println("");
49             }
50         }
51     }
52 }
53 }
54 }
55 }
56 }
